3	Feb 12 2014	354an JaeSchroe	T/4 hon-Jee Schmox: Ehohew	- UI
6	Feb 12 2014	253an Jae Schnoe	TH hon-Jee Schmox: University	- 75
ŝ	Feb 12 2014	252an Jae Solarce	This hon-Jee Solance: Yite	
5	Feb 12 3014	352an Jue Solmoe	Tid hon-Jae Solmow Median	
	Feb 12 3014	34km JurSchnor	Ed hon-Jae Solmore Cold	
i .	Feb 12 2014	00 4Gam Jan Schwort	154 hon-Jee Schnoe: Hidden Hude	
í .	Feb 10 2014	7.27an FailLader	T4 hon Paul Laute: Tette	
ín –	Feb 10 2014	\$45an FaulLader	Tri hon Paul Laute: VOIDE	
8	Feb 10 2014	644an Paul Laufer	Di ton Paul Laute: Yes I can epix.	
	140 10 2014	0.4481 1.821 1.821	the manifest cause. The Carringly	

Inbound Text Messages are sent to the Pending tab of the appropriate contact record as Other Actions, activity code = TXI, with alarm turned on.

If you wish, you can rely on GoldMine's internal alarm functionality to let you know when a new Text has arrived for you. However, many users Suspend GoldMine's alarms and, therefore, GoldSMS Alert comes into play.

We recommend that you place GoldSMSAlert.exe in your Windows Startup folder.

When running, GoldSMS Alert sits quietly in the Windows Notification Area (System Tray), normally found in the lower right corner of your screen. When a new Text arrives for you it raises an alert as shown above. You can double-click any of the entries on the list to go immediately to that contact record.

If you click the tray icon, you get the following options:

Close	e/Reset GoldSMS Alerts (v. 1.10.043)	
	Shut Down Alert Monitor	
	Reset - Show All Alerts (STEVEN)	
	Cancel - Continue Monitor/Alert
